

FeelFree Beaver Tail BT Rudder Kit

feelfree

FeelFree

Product number: FFK-BT-RDDR

Retrofittable steering gear with large rudder blade for your FeelFree kayak.

from 122,90 €* 122,90 €

FeelFree's Beaver Tail BT Rudder Kit makes it even easier to navigate your favorite fishing spots while fishing, as the oversized rudder blade allows even maneuvering in the smallest spaces.

The sets come with all the accessories and parts you need to retrofit your FeelFree or Big Fish kayak. Just the tools for the installation are required.

If you have a FeelFree Moken (12.5, 14) or a FeelFree Lure (11.5, 13.5, Lure II Tandem) without steering gear, you need the variant **Moken and Lure**. If you are also in possession of the Overdrive System or have a Lure with manual control, you need the variant **Lure with Overdrive**. For the 3Waters kayaks Big Fish 105 and 120, the **3Waters Big Fish** version is available, which, in contrast to the others, has a complete foot pedal and rail system included. If you own a **Lure V2 or Moken V2**, you will need the Beaver Tail Lure and Moken V2 Rudder System, which is compatible with the V2 Moken and Lure kayaks. Comes complete with rudder, toe steering foot pegs, instructions and hardware. Requires tools for installation
