

NRS Pro Guardian Wedge Waist Throw Bag 17m

NRS

Product number: NRS-PG-17

An excellent choice for swiftwater emergency work

119,99 €* 119,99 €

In your boat or scouting a rapid, the NRS Pro Guardian Waist Throw Bag gives you 17 m of high-strength rope that's always there when you need it.

- High-strength 6 mm UltraLine Water Rescue Rope is suitable for unpinning kayaks as well as rescuing swimmers.
- The outer bag has a wide hook-and-loop flap and a zipper to facilitate removing the inner bag. Drainage holes in the bag expel water quickly.
- Removable Wedge Throw Bag has foam flotation to keep it on top of the water, mesh sides for drainage and drying, and reflective taping for increased visibility.
- A quick-release buckle on the adjustable waist belt ensures safe exit in an emergency.
- The internal throw bag comes completely free from the waist belt.
- Webbing loops along the belt allow you to attach carabiners.
- 6 mm UltraLine rope has a maximum tensile strength of 2495 lbs. (11.6KN).

Rope knots reduce tensile strength. For this reason, we make no claims regarding a rescue bag's strength. Maximum load indicated is for the rope alone.
