

# Railblaza C-Tug Kayak Canoe and Rubber Dinghy Trolley

Railblaza

Product number: RB-CTG-915

The Ultimate Kayak & Canoe Trolley

from 119,90 €\* 119,90 €

The C-TUG kayak trolley is designed and manufactured in Napier, New Zealand. Unlike any other trolley in the paddle sport arena today, C-TUG continues to amaze sport enthusiasts with its rugged appeal, incredible strength and satisfying good looks. With yet another design improvement, the puncture-free wheels now have hi-grip rubber tread.

## The Ultimate Kayak & Canoe Trolley

The New Zealand made C-TUG Kayak and Canoe trolley is setting new standards with its sophisticated style and precision design. C-TUG is the best, most versatile and durable kayak trolley on the market. It carries up to 120kg (300lbs), dismantles for easy stowing, won't rust.

The only "engineered" cart on the market!

If you have an old C-Tug with pneumatic wheels and want to upgrade, all you do is clip off your old wheels, and clip on the new ones, easy as!! Please see your local C-Tug dealer to buy your new, puncture-free wheels.

Part Number: 08-7002-71

## Original – Unrivalled – Envied

The C-Tug is the most durable, practical, light weight, kayak & canoe trolley on the market. Made of quality engineering polymers, this trolley is great for all terrains, and will last many, many years.

- Dismantles in under 20 seconds

- Fits inside kayak hatch
- Tool-free assembly
- Light weight 4 kg (8.8 lbs) and easy to handle
- 120kg (300 lbs) static loading
- Reinforced composite material
- Thermo-bonded elastomeric hull pads
- Stainless steel reinforced axles
- 2.8m (9 ft) strap with heavy duty buckle
- Adjustable kick-stand

## 2 Wheel Models

### a) Puncture Free Wheels

Puncture free with hi-grip rubber tread to soften the ride. If you have an old C-TUG with pneumatic wheels and want to upgrade, all you do is clip off your old wheels, and clip on the new ones, easy as!!

The Kiwi wheels are supplied as a pair, and make for hassle-free use, no more pumping, and no more punctures.

Dimensions: Diameter 260mm (10?), Width 90mm (3.5?), Axle length (inner to outer bush face) 83mm (3.27?)

Part Number: 50-0002-71

### b) SandTrakz Wheels

When it comes to moving loads over soft sand, wider wheels are not necessarily better. Bulldozers and military tanks use long tracks, reducing the chance of them digging in.

SandTrakz puncture free wheels mimic this track system, the outer rim compresses when in use giving a longer track length. On soft sand this reduces how hard you have to pull to move your trolley by more than half compared to standard puncture free Kiwi Wheels\*! In fact the SandTrakz system is so effective we think it's better than balloon wheels!

- Half the effort
- Puncture free
- Fits inside hatches
- Fits all C-TUGs

Whilst they are designed to make life easier on soft surfaces, SandTrakz wheels are great on hard surfaces. Because C-TUG SandTrakz are designed to compress they act like suspension on hard surfaces, making for easy transition from soft to hard surfaces.

Dimensions: Diameter 305mm (12.5?), Width 90mm (3.5?)

Note: A C-TUG cart with SandTrakz wheels is effective for loads up to 80kg, but over this weight effect may be reduced. Load should not be stored for long periods on SandTrakz Wheels. Wheels must be washed to remove sand from axle area after each use. Do not leave your SandTrakz wheels in strong sunlight for extended period.
