## Railblaza SandTrakz Spare Air Wheel for C-TUG Trolley

Longer is better than wider!

When it comes to moving loads over soft sand, wider wheels are not necessarily better. Bulldozers and military tanks use long tracks, reducing the chance of them digging in.

SandTrakz puncture free wheels mimic this track system, the outer rim compresses when in use giving a longer track length. On soft sand this reduces how hard you have to pull to move your trolley by more than half compared to standard puncture free Kiwi Wheels\*! In fact the SandTrakz system is so effective we think it's better than balloon wheels!

- Half the effort\*
- Puncture free
- Fits inside hatches
- Fits all C-TUGs

Whilst they are designed to make life easier on soft surfaces, SandTrakz wheels are great on hard surfaces. Because C-TUG SandTrakz are designed to compress they act like suspension on hard surfaces, making for easy transition from soft to hard surfaces.

RAILBLAZA Part Number:

**50-0005-71** SandTrakz Sand Wheels (pair)

Diameter = 315mm (12.5?)

Width = 90mm (3.5?)

Bore = 25.4mm (1?)

### **What you get:**
