The Titan is a pedal-driven fishing kayak in a class of its own.

The Titan Propel 13.5 is huge and offers unsurpassed stability and freedom of movement. Perfect for fishing for big predators, where a lot of leverage is needed to catch up, this kayak is a fulfilled anglers dream. This boat has 4 easy-to-reach horizontal rod holders with rod tip protection and an adjustable 1st class seat designed for a comfortable change between standing and sitting, that can be disposed for a completely accessible deck.

The Titan also contains an internal foam layer that increases floatation, safety, stiffness and carrying capacity to incredible 250kg. In addition, the boat has two attachment options at the stern for double anchorage, to further increase stability.

To attach an electric motor for a motor assisted ride, a special motor bracket can be purchased separately.
