

Bassday Crankbait Mogul Crank SP-003

Matte Perch Target

Bassday

Product number: KL-BDC-SP003

Japanese high quality crankbait.

0,00 €* 0,00 €

Bassday's Mogul Crank is a high quality Crankbait and is excellent for fishing for perch and pike.

This lure is equipped with a large, stable diving lip and shows the classical floating behavior, as it is usual for crankbaits. The Mogul Crank can be retrieved quickly while running in medium water depth or, on the other hand, slowly with the bottom bouncing technique. Its strong action in combination with the beefy body ensures high pressure on the lateral line of the fish, so that large areas of the water can be searched quickly and violent bites are not infrequently.

The Target 3 with a size of 5.7 cm and a swimming depth of up to 3 m is ideal for summer when the predators are more likely to be in the middle water due to heat. The Target 5 reaches even greater depths of up to 5 m and is distinguished by its size of 6.3 cm thereby also to bring big fish to the hook. With two high-quality Japanese Owner triplets, both models are ideally equipped for successful fishing.
