The ME-RA SHAD S is a swimbait without diving lip, which is a realistic imitation of a whitefish. Let it sink to the requested depth after the cast and during retrieving it will come up step by step. Like this you cover a wide range of diving depth. If you want to fish steadily in one depth, you have to make frequent retrieve stops, so that the ME-RA SHAD S can sink slowly again - perfectly balanced with a low center of gravity. Retrieving it steadily makes its action irresistible, like a real whitefish in a natural movement. This jerk shows its whole versatility during twitching and jerking: it erupts controlled in all directions and like this teases many predatory fished to heavy attacks.
