The Spike has been developed by one of the most famous bass pros in Japan, Toshi Namiki, in cooperation with DAIWA. The Spike is a plug for medium diving depths, which is getting down very fast after the cast - consequently the lure is running in the preferred depth for a longer time. It is also perfectly suited for fishing in areas close to the shore. The special design and the compact shape enable great casting distances – ideal for baitcast reels! The Spike is also perfectly fitting for fishing for perch, asp and zander.
