Daiwa Tournament Lure Mega Scouter 6,8cm

Crankbait floating lure

The 68mm Mega Scouter is a floating lure with a very energetic wobbling action and short, bustling movements. Due to its diving lip, it reaches very quickly deeper water levels. The rattles emit strong vibrations and frequencies you can feel during the retrieve up to the rod during retrieving.

Usually the sound even activates lethargic predators and enhances the bite's frequency. The inside weight system is perfectly balanced to let the main tungsten weight role to the front during a short and strong push of the rod to enable an even steeper diving angle in order to reach depth faster.

Diving depth ca. 2.5-3.5m, trolled more than 5.0m (perfect for zanders on the ground)
