

Deps New Slide Swimmer 250 SS Swimbait

Deps

Product number: DS-NSS250

High quality swimbait specially designed for big fish hunting.

114,99 €* 114,99 €

A magnum bait of the highest order for huge bass. The "new Slide Swimmer 250" is a magnum-sized big bait developed exclusively for catching huge fish. The soft shell and ABS hollow core composite body creates a realistic wave action, and the massive 250mm body gives off tremendous fish attracting power, allowing you to target and catch the record class of fish that live in that area of water, for a different dimension of monster hunting. The new Slide Swimmer 250 has a realistic action that meanders through the mid-range and reacts quickly to rapid rod action to trigger reaction bites.

A new standard for big baits, born of an era in which even a 70cm lure is no longer a dream or an illusion, and of the extreme demands of the hunters who chase it. The "new Slide Swimmer 250", with its impressive size and weight, is the only one of its kind that can provide a reliable answer to the toughest of giant fish hunts, where only record size fish are allowed.

LENGT: 250mmWEIGHT: 6.2oz
