High End Swimbait from Japan

46,99 €* 46,99 €

The Deps New Slide Swimmer 115 Swimbait is the smallest variant of the legendary New Slide Swimmer series and offers the same breathtaking action as its predecessors. Now new in 11.5cm to bite into, to appeal to all sizes of predatory fish. The Deps New Slide Swimmer 115 Glide Bait consists of two parts with a joint and swims with a wide S-movement from side to side, which attracts the predatory fish and stimulates an aggressive bite attack. The Deps Slide Swimmer 115 swimbait also has an ABS-injected core with an inner featherweight in the head, which creates weak knocking acoustics when cranking in faster and creates a subtle vibration during pause.

Externally, the Deps Slide Swimmer 115 Glide Bait is covered with a soft plastic skin that has extremely realistic details, including precise coloring, 3D eyes, and lifelike scale patterns and gills. The Deps Slide Swimmer 115 wobbler is equipped with two sharp treble hooks. The new Deps Slide Swimmer is a perfect slide lure for imitating small prey that any angler can fish without special equipment.
