FOX RAGE LURE HITCHER 100DR CRANK & TROLL

The perch is the number one prey fish of many big predators and was the inspiration behind the development of this hardbait. The distinctive shape of a perch gives the Hitcher the typical humpback, slightly compact body.

The one-piece deep runner is suited to both trolling and casting. With a steady retrieve it staggers slightly to the side and the steel balls in the belly produce a fish-attracting rattle. With its low frequency, smooth running and the uneven showing of its flanks, the lure imitates an easy prey. It resembles a battered prey fish and is available in 'natural' prey fish colours and also brighter colours.

Lures with the DR logo are "Deep Runners". They have a large horizontal diving lip with a slight inclination. These lures will always dive very fast up to 3.5 meters. Ideal for deeper waters or when the predators are right on the bottom.

- An ideal hardbait for all predators
- Perfect for deeper water situations
- Designed to mimic an injured perch
- Can be cast or trolled
- Comes equipped with strong power point trebles
- 10cm in length
- Deep runner available in standard and jointed
