

Hybrida Lure C4T Crankbait 5,5cm

The new Hybrda C4T Crankbait is a universal searchbait that drives all predators crazy. Due to its massive shape, it develops a high-frequency amplitude in its running behaviour. The **Shallow Runner** can hit takers at depths of up to 1.5m. The **Deep Runner** reaches depths of 2.5m. When trolled, it follows its course perfectly without breaking out. Made in Germany, the C4T is one of the best perch lures on the market.
