

Hybrida Lure W1 Tropic Walkbait 12cm 40g

Hybrida

Product number: HYB-W1TW

Stickbait fur the hunt on tropic predators.

23,90 €* 23,90 €

The W-1 Walker gets an upgrade! On the test trips of the Hybrida team, the idea arose to design a long cast bait in stickbait form for surface hunts by saltwater predators. The new W-1 Tropic Walker was born.

He also benefited from the experience Hybrida had with their classic, the J-1 Jerkbait. Of course, the W-1 is also provided with a 1.8mm thick, continuous wire axis to be able to cope with the aggressive bites of Tuna, Jack and Coubera. The bait size corresponds exactly to the prey fish spectrum. The decors are fully focused on visual stimuli, which include to be provoked by the holo design.

With the topwater hunt you now have a new, loyal companion at your side, who can elicit your dream fish from every feeding fancy.
