Hybrida

Product number: HYB-J1S-BROUV

Classic from the house of Hybrida.

Weight: 0.07 kg
19,50 €* 19,50 €

The "J-1" is one of the first jerkbaits of Hybrida. The "J-1" is a beautiful, compact, mid-size jerkbait type Glider. With 15 cm length and with its 70 g makes it an excellent bait for fishing with a jerkbait combo. The run can be described as fast. He prefers long webs and tends to rotate around its own axis, so to speak, he shows his stomach, which in turn amplifies the visual effect. The "J-1" will flash, so to speak on under the water! The "J-1" is very suitable for fast fishing out large areas.

Even slight short rod strokes let this Jerk provocatively break to the sides. The Glider sinks medium fast, but you can with him both in shallow waters (from 50 cm) as well as in deep water sections Fishing out (to 3 m).

A very important feature of the "J-1" is the highly seductive in decline "trembling" while spinning stop - which can resist no Esox!

Our tip: After retrieving the Jerks insert small spinning stops, depending on the water quality even up to 10 seconds. Then with long jerk accelerate the Jerk - then usually come the attacks!
