The Rerange 110 SP is a clear favourite for all anglers who need to cast really far or have to deal with headwinds. The patented weight-transfer system (a resin-coated tungsten cylinder) and the specially designed flanks make the longest casts possible. A perfect imitation of a small prey fish and ideal for energetic switches and jerks. The Rerange 110 SP has a pronounced rolling and shimmers seductively even in poor visibility! Be sure to try it out!
