

Illex Riser Bait 004 Lure 4cm 5.5g

Illex

Product number: IL-RIBA-004

Smallest representative of the Riser Baits with the characteristics of the big ones.

0,00 €* 0,00 €

The Riser Bait 004 (4cm) is the smallest member of the Riser family, with the same running characteristics as its larger brothers. To imitate a prey fish on the run, you need to do nothing more than cast and retrieve. The Riser Bait 007R comes back to the surface very quickly thanks to its special metal lip and then the dance really starts!

Surface fishing is raised to another level with these baits. No matter if perch, asp or chub as target fish, the Riser Bait attracts many species. Due to the compact shape and the quite high weight, precise and wide casts are possible. An innovative bait you should definitely try!
