The Illex SK-Pop Grande Popper 5.3cm lure - Bring the water to life!

Seiji Kato, master of fine-tuning, has provided the SK-Pop with a multitude of small refinements that make a popper a true masterpiece. Compact and well-balanced, this popper can be thrown as precisely as a bullet from a gun barrel thanks to its ingenious weight distribution! It masters the art of 'walk the dog' and produces perfect splashes and pops. This is thanks to the innovative design by Seiji Kato, who has given it two recesses in the concave mouth. Remember, longer pauses can also be extremely effective with poppers, just like with any other Illex surface lure.

It has the following features: Compact and well-balanced for optimum performance in the water. Precise casting performance thanks to perfect weight distribution. Masters 'walk the dog', produces perfect 'splashes' and 'pops'. Two indentations in the mouth for optimum effects. Effective pauses for a seductive presentation.
