This latest generation Tricoroll Ryushin Minnow is compact, 43mm long and has been specifically designed for trout feeding on small prey fish. In fast streams, the Tricoroll Ryushin 43 SHW sinks quickly and is very versatile. Casting upstream, the lure holds perfectly in the river. When cast downstream, the lure can hold itself perfectly in the current. In strong currents, stops make it flutter, anyway it can always be controlled well...ideal to outsmart trout when they are deep. Great for small rivers and mountain streams, the lure casts accurately and is perfect for overgrown banks. The small plug is great fun to fish when twitching and jerking the trout in greedily.
