The perfection of a natural prey fish.

Jimmy is one of the most realistic swim-bait that you will ever find on the market. The Jimmy has 5 segments, which allow realistic swimming action in the water and does things that no other swim-bait does. He can be fished like a swimbait or jerked like regular jerkbait. When the "big one" is following the bait but not willing to take, anglers have the option to switch from a swimbait action to a jerking, twitching action to entice the big catch. Everyone who has seen the swimming action of the Jimmy thinks it is a live fish.

The life-like paint design makes it hard for fish to tell if it is real or not.

All Baits Feature:

- 5-Selections
- Slow sinking
- Sharp + strong hooks
- S-Action swimming motion
- Side-to-side and up-to-down motion head
- Incredible lifelike finish
- Super durable PVC tail
