A blend of action and imitation that makes the Pointer - B'Freeze a classic in lure fishing.

The B'Freeze / Pointer has been designed with a very low centre of gravity using special brass weights. The low centre of gravity causes the lure to wobble and vibrate as soon as the cranking is stopped. The B'Freeze / Pointer swims 1.2-1.5 metres deep and emits a fascinating fish vibration when floating. A short twitch of the fishing rod produces the "Walk the Dog" action under water.
