Megabass

Product number: MB-FSLBO-21

Phenomenal action with the next-generation LBO II moving balancer system

0,00 €* 0,00 €

Modeled after the Threadfin Shad, one of the favorite baitfish of US waters, the Megabass FLAPSLAP is one of the most versatile lures in the Megabass lineup and an all-year-round producer. Featuring Megabass internal Shaft Balancer System (PAT.), the Megabass Flap Slap always returns to its center of gravity, allowing the Flap Slap to be burned at high speeds or even worked with hard snaps of the rod.

The built-in Megabass Shaft Balancer System (PAT.) is adapted from the Vision 95, and gives the Megabass FLAPSLAP a unique, rolling action that can mimic an injured baitfish. The unique design of the allows you to fish it with a steady or stop-and-go retrieve like a conventional crankbait, or with the distinctive jerks associated with lures like the Megabass VISION ONETEN. Through each retrieve style/speed, the balancer system keeps the Megabass FLAPSLAP running true, allowing for distinct presentations.

The Megabass FLAPSLAP will work in a variety of situations, but some of the most ideal are around rocky banks, riprap, and over submerged grass beds.

- Length: 77 mm
- Weight: 12,4 g - 7/16 oz
- Type: Suspending
- Hooks: #6 / #6
