

Megabass Vision OneTen R+3 Jerkbait 11cm M Champagne Kinkuro

Megabass

Product number: MB-469817

Vision OneTen Jerkbait with up to 4m running depth

Weight: 0.014 kg
29,49 €* 29,49 €

The ONETEN R+3 joins the ONETEN R series.

Inheriting the concept behind the ONETEN R, the R's depth has finally reached 4m! Just imagine... the performance of the ONETEN R at a depth of 4m. The ONETEN R's realistic baitfish darting and irregular actions are being brought to a range previously only occupied by big cranks. What's noteworthy is that while having the ability to dive to such depths, the R+3 maintains light pulling resistance and with jerking can perform sharp darting in the deep zone that can trigger reaction bites at will. Years of Megabass hydrodynamics research and the unique actions of the ONETEN will now take the deepest range by storm.

ONETEN R - CONCEPT

1. ONETEN R retains the sharp, darting action of the original ONETEN, but during retrieves it's designed to perform a refined, natural action that will get the attention of even the most cautious bass.
2. Moving balancer system now features one tungsten weight instead of two. By combining the weights into one main weight, it increases the casting power and flight distance due to its beautiful flight posture.
3. By switching between the ONETEN R, R+1, and R+2, you can adjust precisely to the appropriate swimming depth.
