

Megabass Vision Onten Jr Jerkbait

Megabass

Product number: MB-VOT-JR

Small version of the Vision OneTen Jerkbait with up to 1,2m running depth.

28,49 €* 28,49 €

The Vision Oneten Jr. packs the tournament-winning characteristics of the immensely successful Vision Oneten jerk bait into a 98mm frame, generating more action per inch than its larger sibling. The Vision Oneten Jr. has been carefully benchmarked against the Vision Oneten, and has been redesigned from the ground up to improve upon the dynamic actions of the original, and expand the range of the jerk bait line. The Oneten's unique action has been distilled into the diminutive frame of the Oneten Jr. Not only does it exhibit wide, erratic darts, but also demonstrates high pitch rolling and flashing during slow retrieves and wobble and roll agitation during fast retrieves. Finally, the dual-tungsten weights of the Megabass Multi way Moving Balancer System (PAT.) allow for incredible flight distance despite the lure's small size.
