The S-Waver has the most natural dying bait action in the world!

When you use a straight retrieve, the S-Waver will show you its famous wide S-action. If you twitch it, it slides from side to side with a wiggle when pausing. When holding your rod tip up the S-Waver will swim subsurface, when holding it down again it will continue to a shallow running swimbait. Use the S-Waver yourself and be amazed at what this lure is capable of.
