Salmo Whacky Lure Crankbait

This Salmo lure created in cooperation with Finnish trolling masters. Thanks to unique lip shape and precise weight balance, Whacky action is absolutely inimitable and irregular. Offered in one size – 12 cm and floating (F) version only.

This lure is designed for trolling for trout, landlocked salmon, sea trout and zander. You can use this lure from spring to fall, because the action changes depending on the trolling speed, that you can control yourself. It works on shallow water, on top of deep water and in any depth with sinker/diver disc/downrigger as you like. Even though this lure is perfect for trolling it still can be used also in river fishing in strong streams. The round lip gives to lure attractive unstable action.

You can see from the first kick that the action is sensitive, unstable, and the action changes all the time depending on the trolling speed. With slow speed the lure action is more stable/slow, for cold water fish. When you increase the speed, the personality of the lure changes and the action becomes more fast, the lure start to go side to side and shake. The swimming balance of the lure is made by using foam on the body of the lure, which makes the lure more floatable and the round swimming lip makes the unique swimming action possible. The lure also makes attractive noise in the water, when the hooks hit the body.
