## Zeck Zander Runner Fishing Lure - perfected for the zander

If you are looking for a high quality wobbler that is tuned to the behaviour of the zander, then the Zeck Zander Runner Fishing Plug is exactly what you need. Developed in close collaboration with fishing specialist Sebastian Haenel, this lure offers subtle running characteristics and special features to help you succeed.

The Zander Runner Hardbait has an integrated Weight Transfer System (exclusively for the 12.5cm variant!). This innovative feature allows you to cast the streamlined lure far. And the special feature: It is completely silent while doing so. This feature is essential when wobbling for zander, as it allows for an inconspicuous presentation of the lure, which significantly improves your catching success.

During a spinning stop, the zander runner tips briefly on its nose before slowly rising. It is precisely at this moment that the longed-for bite often awaits you. Especially near the shore and with active zander, this shallow-running wobbler delivers excellent catch results.

The Zeck Zander Runner Fishing Lure should be guided slowly. In murky water, as well as during the evening and night hours, it is particularly promising. Make your fishing trip an unforgettable experience and enjoy the fulfilling feeling when the zander bites.

This excellent fishing lure is available in five appealing colours: Pickle, Nightshade, Pinki, Reactor and Tortel Green. Choose the colour that best reflects your individual preferences and the conditions on the ground.
