

Nils Master Lure Invincible 055 Grey Black

Nils Master

Product number: INVX-055

Lure from Nils Master

18,30 €* 18,30 €

This prolific fish catcher Invincible lure has a slightly arched shape which produces a revolutionary swimming action. The Invincible wobbler floats on the surface but just a slight retrieve or pull gets it diving with a swimming action that imitates a bait fish. When the pulling stops the Invincible bobs back to the surface. Suitable for casting or trolling. Excellent for fishing pike, muskie, zander, walleye, salmon, trout, bass, barramundi and a large variety of other fresh and salt water fish species. This lure as every Nils Master wooden lure has been individually quality controlled, hand-tuned and tank-tested before packaging. However a hard fished lure can occasionally get "out of tune". If the lure tends to swim consistently in one direction, adjust by bending the eyelet toward that side. Swimming action can be controlled by slightly changing the angle of the eyelet-an upward bend decreases the swimming action, a downward bend will cause the lure swimming stronger.
