Viper Jerk - Jerkbait

The Viper Jerk of Hybrida combines the classic run of jerkbaits with the edges of a seductive Softbaits. The Viper is with 24 cm length and 100 g weight the longest bait of Hybrida. The moderate sinking behavior in connection with the Softtail lets hope for a bite shortly after landing. If desired the Viper Jerk runs in depth of 1-2 meters. The single hook assembly in the back of the Vipers Hybrida breaks new innovative ways. The single hook is mounted so that it is released during a bite by pin fixing and can be inserted without any problems again. Another advantage of the single hook is the reduced "Selflocking danger" of the softtail! The soft tail can be easily replaced without glue if necessary.

- length 24 cm
- weight 100 g
- diving deep 0,2-2 m
- sinking
- easy to fish
