

Illex Casting Jig Blue Blaster 75

Illex

Product number: IL-BB75

Casting Jig from Illex Nitro Series

0,00 €* 0,00 €

The Blue Blaster is a compact casting jig made from solid tungsten-bismuth. Tough enough to withstand repeated attacks from the toughest predators in the world! This lure casts like a dream despite its relatively small size and is great for reaching long range hunting fish, notably tuna when chasing anchovy shoals. The lure features a flat stomach section that keeps it stable on fast retrieves but still lets you waft it slowly through likely killing zones. The asymmetrical fixing point generates an attractive rolling action as soon as it hits the water. The lure is designed to sink flat and the incurved sides reflect provocative flashes. A lot of care has gone into the finish and the detail around the eyes, the mouth and the gills finished this lure off perfectly.

Model: Sinking

Weight (g): 31

Size (mm): 75
