A classic jig shape that hides a surprisingly versatile lure. The FIGHTER JIG lends itself to a wide variety of techniques. Responds well to wide slides and back sliding on the drop. Fished classic jigging style the lure is very mobile and highly reflective which is very attractive to mid water species. Finally as a casting jig the FIGHTER JIG performs well. Great for fishing at long range with medium to fast retrieves. The realistic body shape is supported by great details around the eyes and gills.
