

Illex Jigging Slow Lazy Jig Green Mackerel

Illex

Jigging Bait from Illex Nitro Series

If you want a versatile slow jig then the SLOW LAZY JIG is for you! Works just as well on the drop as coming up. On the way down the jig has a lazy wobbling action interrupted by sudden twitches and sideways darts generated by the large asymmetrical body shape. When being more actively fished the SLOW LAZY JIG is surprisingly responsive for a lure of its size and is easy to pitch and slide with broad sideways sweeps. Two great ways to work this jig are slow pitch jigging and long falls. The jigs are very well finished with solid paintwork and a lot of attention to detail around the eyes and gills and are proven baits for a host of sea predators whether in the Atlantic or Med.
