

Jenzi Norway Bergman Pilker

Norway-Pilker

The real big boys are usually found at great depths. In order to quickly get to the fish during the drift, the Norway-pirk has a rocket-like shape. This causes it to shoot straight down without delay into the deep. The most well known traditional Norway pirk is back. Its unique "Wave-Form" makes for a super fast descent into the deep where it then sends out stimulating signals to large fish. With super strong split rings.
