Fox Rage's legendary soft bait, which was extremely successful for the RAGE team during the testing period over the last years. There is almost no other soft bait that showed similar results in such a short time like the Zander Pro Shad. The clever shape of the tail not only produces a very natural lure movement, wobbling slightly from side to side but eliminates the risk of over-stretching the tail when fishing the shad or in fast moving water. Thanks to its extremely robust rubber mixture the shad's life is five times longer and produces a high frequency vibration around the shad, which is very attractive for perch and zander.

- Brilliant addition to legendary lure pattern
- Highly UV active
- Exciting additions to anyone's lure box
