

Hideup Stagger Wide Softbait #116 Shinikake Gill

Hideup

Product number: HU-STGRW-116

Flat soft lure made from an eatable material mix.

0,00 €* 0,00 €

The Stagger Wide is the much wider and flatter version of the Stagger Original. It was designed by Hideo Yoshida, one of Japan's most respected bait designers.

The big, flat body sinks like a sluggish pendulum towards the ground in the break between twitches and gives time to big predators to notice it. The unique, well thought-out shape produces 1.5 - 2 times stronger vibrations than conventional soft lures. The very dense and yet elastic material mixture is edible for fish and the incorporated attractant attracts all predators, whether perch, zander, pike, chub or even catfish.

The Stagger Wide fishes well in and around obstacles and overgrown, weedy sections, as it rarely gets stuck thanks to its flat, rounded shape.
