Discover the Illex Driftfry Mellow 5.2" - The ultimate soft bait for ambitious anglers

Welcome to a new dimension of fishing: The Illex Driftfry Mellow 5.2" sets new standards in the world of artificial lures. Specially developed for fishing for European freshwater predators such as perch, zander and black bass, this 13.2 cm long soft lure impresses with its unrivalled attractiveness under water.

Excellent properties for outstanding results:

- **Hyper-realistic design:** thanks to the detailed design of the eyes, gills and scales, which imitate small juvenile fish deceptively realistically, this lure impresses with its authenticity.
- **Optimised swimming dynamics:** An innovatively designed air channel reduces the density, ensures perfect balance on the jig head and creates a lifelike swimming movement.
- **Innovative lip for precise guidance:** The special lip design enables small areas to be fished precisely with finesse twitches. The lip can be shortened to adapt to different finesse techniques in order to optimise the effectiveness of vertical and heavy drop shot strategies.
- **Increased attraction:** The combination with [Magic Tungsten Micro Round Head](#) or [Magic Tungsten Round Head jigheads](#) is recommended to intensify movements and maximise reflective effects on the sides, which effectively attract predators.

Technical details:

- Size: 5.2" / 13,2 cm

- Weight: 10,5 g
- Swimming behaviour: Floating
- Target fish: Perch, zander, black bass

For the modern angler: The Illex Driftfry Mellow 5.2" is more than just a lure; it is an essential tool for every passionate angler. With its perfect blend of precision, effectiveness and lifelike design, it is designed to convince even the shyest predators. Prepare yourself for unforgettable fishing experiences with this innovative highlight of lure technology.
