

# Illex Magic Larva Rubber Larvae 3,5cm 1,14g

Illex

Product number: IL-ML35

Rubber larvae that are perfect for use on trout lakes.

9,50 €\* 9,50 €

Our experience with river chubs with insect imitations and competitions on trout on the pond, has led to the incredible Magic Larva. The bristles create a smooth action that works great on trout lakes. Let the Magic Larva drift down the river, aggressive takes from chubs and trout are guaranteed! Can be fished with a Micro Jig Head or in midwater with a hook lightly loaded with a small tungsten ball. For surface fishing it's best to use an extra light hook like our Finesse Down Shot. To make it even more attractive, the special rubber has been impregnated to the core with a salmon egg attractor.
