Jenzi Corrigator Hoover Swim-Bait Drop-Shot Fishing Lure

The Hoover Swim-Bait is designed for the ambitious fisherman. The hollow belly design of the Hoover Swim-Bait makes it applicable for drop-shot fishing, fishing with jig-head, and fishing with a weighted hook. Every element, from the action to the realistic colors, is designed with one thing in mind ... To Catch MORE and BIGGER Fish!

Rigged with the Jig-Head:

Use the provided jig head. Insert into the head of the bait and thread hook through the top center of the bait. The action will be perfect and gives the Hoover Swim-Bait its wobbling and rolling action. This rigged system causes the tail to float while the nose points down.

Rigged with Weighted-Hook:

Use the special provided screw-hook. Thread the screw into the nose of the bait, insert the hook through the bottom of the bait coming out of top and place the hook point flush with the top of the bait making it weed-less. The weighted-hook acts as a keel, for a fast or slow retrieve. With the rod tip like the jerk-style the Hoover Swim-Bait will "wake" and works with a great side-to-side motion.

Can also be used with a stinger.
