Lucky John Softbait Minnow T27 Pink Flake

LJ MINNOW is the most popular model of a shad with a classic shape. The shape of the lure's body resembling a little fish along with a tail fin generate incredible swings when moving in water. The material used in LJ MINNOW soft lures deserves particular attention. The base of the lure is soft plastic, which perfectly retains the shape of the lure and is resistant to external impacts. It has certain immunity to predator's teeth, an explicit taste and scent of mackerel due to the aromatic salt introduced in the structure of the material and a special aromatic oil used as the coating of the lure. It would be no exaggeration to state that the combination of soft plastic resistant to predator's teeth, a strong attractant and a wide range of colours makes this lure universal for any type of angling for the most popular predator fish, such as pike, pike-perch and perch, using jig tackle.
