

Megabass Soft Bait Dark Sleeper 2.4in 6cm 7,1g

Megabass

Product number: MB-DS-7

Lifelike soft bait with a hidden hook in the dorsal fin
as weed protection

0,00 €* 0,00 €

DARK SLEEPER was developed to target fish holding to bottom structure with overwhelming realism and paddle-tail action. With a top fin designed both to camouflage its hook, and gently deflect off of structure, DARK SLEEPER is able to hold tight to cover, and move through complex structure. Low center of gravity weight setting and bottom fins keep DARK SLEEPER upright as it moves through structure, for a naturally appealing approach.

BACK FIN GUARD

Tall top fin hides the hook point to reduce snags, yet is soft enough to absorb strikes and allow for decisive hooksets.

PECTORAL BALANCER

Weighting and bottom fin design offer a low center of gravity for ideal action to target bottom structure.
