Rigged as a soft jerk, the NDL impresses with a unique side-to-side action, even with the slightest twitches of the rod. In combination with a darter jig it has very fast darting action. Molded with a deep hook slot, this soft bait can be used perfectly for weedless fishing. The Nays NDL is loaded with salt, which improves the castability and enables a natural falling action with vibrating pintail movements. This lure is one of the most versatile weapons for predators, that Nays has ever designed.

- Pintail
