Phantom-F Metal Wave Spoon

The shape of the Phantom-F Metal Wave Spoon is what makes this lure stand out as a classic among spoons. The shape is further enhanced by the adding of “waves”. The wave shapes were designed for the purpose of creating strong pressure waves and vibrations, which immediately gain the fishes attention. The “darting” movement is created by the wave shaped design. The Phantom-F Metal Wave Spoon is available in 3 common weight classes 16 g. / 26 g. and 31 g.
