

Trout Bait Spoon Potenza 27 Black Glitter Leopard UV

Trout Bait

Product number: TB-PNXXAC27

Beautiful, handcrafted predator spoons in 4 different weights.

0,00 €* 0,00 €

Tested in the cold lakes of Karelia, the river Onega and the Lake Ladoga, these extremely high-quality brass predator spoons take fishing with spoons to a whole new level.

The special brass alloy, which serves as the material for all spoons from Trout Bait, creates underwater a very special, incredibly catchy sound that attracts every predator. Whether it's hungry or not. In addition, brass can not rust and is, just like the UV inks used, corrosion resistant and therefore also ideal for salt water. The special design ensures perfect casting properties and ensures, that the spoon maintains its play even in strong currents, while it wobbles and blinks in stagnant waters as soon as you allow it to take a short break while retrieving. Thus, the Potenza spoon is suitable for various fishing methods and can be applied to several target fish such as pike, salmon, zander, sea trout and taimen. The chemically sharpened, particularly robust triple hooks ensure that your catch doesn't jump off the hook again.

- Handmade in the EU.
