The bulbous body and small vertical lip create extremely strong wobbling and intense vibrations. Reeled in slowly, it works as a mini wake bait. The ripples arouse the curiosity of nearby predators, who associate these ripples with a mouse that has fallen into the water, a lizard or a dying fish. Reeled in quickly and with a deep rod tip, the CHERRY ONE FOOTER runs about 30cm below the surface. Be ready for wild takes and plenty of chasing fish!
