Jenzi fishing rod Viplex ONE

Handcrafted Viplex ONE rods comprise a revolutionary design. On top of that they are equipped with the newest generation LC – Long Cast rings and a special aluminum light construction reel holder. The new HI – Modulus Blank (high density blank) is thin and light, while at the same time possessing an ultrafast and accurate spine. In addition to this, an integrated visible Hi-modulus carbon fiber support was added to protect the rod from breaks when placed under heavy use. By combining state of the art materials we have succeeded in developing a rod series that is both unbelievably "light" and "fast". This provides the angler with adequate reserves given long fights and flight attempts, resulting in the fish becoming tired.

- 2-piece
- Carbon-Blank-Construction FSP
- Exactly balanced
- Extremely attractive design – with visible carbon parts
- High density and extra-hardened 2-piece EVA handle
- Aluminum component handle
- Extraordinary – a new generation in rod manufacturing
- Light – Fast – Extremely thin – Handcrafted
- Finest cork – 2-piece handle – full carbon – Long Cast Rings
