NRS Raku Fishing PFD Angler's Buoyancy Aid - The ultimate companion for your fishing trips.

Ergonomic and comfortable, the NRS Raku Fishing PFD Angler's Buoyancy Aid is specifically designed to provide anglers with the best possible support. It is equipped with everything you need to enhance your fishing comfort and efficiency, while providing an unparalleled level of safety.

Superior comfort and flexibility

The Raku PFD is a prime example of NRS's focus on comfort and flexibility. Its five-piece design and PlushFit™ foam flotation provide superior adaptability to your body shape and movements, whether paddling, rowing or casting and landing. It fits comfortably on any kayak, raft or drift boat seat, thanks to its ventilated thin back.

Practical features for anglers

But what really sets this buoyancy aid apart are its practical fishing features. It has two large, internally divided zipped pockets that provide enough space for tackle boxes, as well as two smaller accessory pockets with velcro fastenings. An additional tool holder pocket gives you quick access to your essential fishing tools and accessories. The PFD also comes with a rod holder, reflective accents and a knife loop to ensure you are well equipped at all times.

Safety and comfort in one

Not only in terms of function, but also in terms of safety, the Raku Fishing PDF Buoyancy Aid from NRS leads the way. It meets the technical specifications and harmonised standards of EN ISO 12402-5:2006/A1:2010, EN ISO 12402-7:2006/A1:2011 and EN ISO 12402-9:2006/A1:2011, and with its front zip and six adjustment options, it guarantees a customised fit.

This buoyancy aid isn't a life saver. To survive, you need to be able to swim. This buoyancy aid is just a swimming support. Level 50 PFD - ISO 12402-5 Swimmers only, sheltered waters, help at hand, limited protection against drowning, not a life jacket.
