

# Halco Lure Poltergeist 50 7g R27 Dark Side

Halco

Product number: HC-PG-R27

The award-winning australian lure for hunting predators.

0,00 €\* 0,00 €

The little joker for hunting predators in both fresh- and saltwater. No matter if pike, perch, zander or sea trout - no one can resist the Poltergeist.

Thanks to its specially shaped body and the strikingly shaped diving lip, depending on the model depths of 3m and 8m with the XDD version can be achieved, despite the small size. And that with a weight of only 7g. We'd like to see anyone else do that!

Two more special features: Halco's lips are made of the same material used in the production of bullet-proof windowpanes. This makes the lips extremely resilient. In addition, they are interchangeable, so you can try out which color captures better at what depth.
