

Illex Water Monitor 95 Lure 20g sinking

Illex

Product number: IL-WMTR95-S

ABS pencil bait for hunting below the surface.

23,39 €* 23,39 €

The Water Monitor is a sinking stickbait, which has 10 stabilizing chambers inside and is made entirely of ABS. It is a pleasure to use the Water Monitor if the fish don't want to completely reach the surface while hunting. You can lead it wonderfully subsurface in walk the dog manner, but also just cranked it runs in a tight S-curve. In the sinking phase, he shakes all by himself. His flares flash seductively and trigger the bite already in this phase! Therefore always keep an eye on the line when sinking! A great bait, all year round.
