

BKK Spear 21-UVO Treble Hook Orange

BKK®

BKK

Product number: BKK-SPRUVO

BKK's Orange Ultra Violet (UV) paint delivers high contrast, visibility and glows when there is UV light available in the water column.

from 8,99 €* 8,99 €

The BKK Spear 21 UVO is developed for deep freshwater applications to allow anglers to fish a wide range of low light conditions, especially deep and dark waters, ensuring that predator species can spot the lure or the bait.

UV light is able to penetrate down into the water much deeper than visible light. Besides, the hook features a round bend and fine wire (1X) that allow for a quick and deep penetration.

An accurately forged hook shank increases the strength by up to 20%, resulting in a much more durable hook.

Furthermore, the moderate length of the hook shank allows the hook to be used with different types of baits such as swimbait, crankbait, minnow and topwater baits.
