Illex

Product number: IL-RRNG-110SP

The Illex Rerange 110 SP - long-casting technology and realistic design for successful predator fishing.

30,59 €* 30,59 €

The Illex Rerange 110 SP: Ultimate long cast precision for anglers

The Illex Rerange 110 SP is a must for discerning anglers looking for long distance casting performance and wind resistance. With its patented weight transfer system, which utilises a resin-coated tungsten barrel, and a specially designed flank design, this hardbait enables amazing casting distances, even in adverse conditions. The realistic design perfectly mimics the movements of a small prey fish and is particularly effective for fast twitches and jerks.

Features:

- **Long cast technology:** The patented weight transfer system ensures impressive casting distances.
- **Realistic design:** A perfect imitation of a small prey fish that irresistibly attracts predatory fish.
- **Versatile movements:** Ideal for energetic twitches and jerks to target fish.
- **Seductive shimmer:** The lure design with pronounced rolling ensures maximum attraction, even in poor visibility.

The Illex Rerange 110 SP is a versatile lure that appeals to a variety of predatory fish, including **perch**, **black bass**, **pike** and **zander**. With a length of 11cm and a weight of 14.8g, it is perfect for a variety of water conditions. Thanks to its **floating** swimming behaviour and a swimming depth of 0.8 to 1.0 m, you can use it specifically where the fish are.

Experience the outstanding performance and catchability of the Illex Rerange 110 SP for yourself!
